

## Your First SureSmile Appointment

### Welcome to Dr. Montano's SureSmile orthodontic treatment!

With SureSmile, we can give you a great smile in less time by applying recent advancements in orthodontics to make your treatment more efficient.

Dr. Montano uses 3-D imaging and computerized treatment simulation to plan the best course of treatment for you.

Once Dr. Montano models the goals for your treatment on the computer, we can make custom wires that are produced robotically to straighten your teeth precisely and efficiently. Treatment is faster because it is customized for you.

3-D intraoral scanning

Computerized treatment planning

Customized robotically-bent archwires

We can finish your treatment up to 40% faster with SureSmile, but we need your help. It is important to follow these instructions to get the most out of your treatment:

- **Avoid foods that could accidentally knock off or damage your brackets**, such as hard chips and sticky sweets. Your custom prescription for straightening your teeth relies on the position of your brackets. If brackets must be replaced, you can slow down treatment. If you break off multiple brackets, you might need an additional appointment to scan your teeth again so we can capture the new bracket positions. For additional information on braces care go to [www.montanosmile.com/what-to-expect.php](http://www.montanosmile.com/what-to-expect.php)
- **Don't miss a scheduled appointment.** Each time you miss an appointment you can add a month or more to your treatment time.
- **Wear your elastics as directed! All** of the appliances in your mouth work together to straighten your teeth.
- **Brush your teeth and floss.** Treatment is easier with healthy teeth and gums, and you will be happier with the end result.
- **Use a fluoride rinse as recommended by the orthodontist to protect your teeth from decalcification.** A buildup of plaque under your braces can result in permanent white spots on your teeth. In addition to brushing and flossing, use a fluoride rinse to protect your teeth.

**See you at your next visit and don't forget to follow Dr. Montano's instructions for "a great smile in less time!"**
